Proceedings of

5th International GOCE User Workshop

25–28 November 2014
Paris, France
CONTENTS

Preface

J. Benveniste & R. Floberghagen

Mission Accomplished – Exploitation Continues

Chairs: R. Floberghagen & J. Benveniste

Keynote Oceanography I:
The ‘OC” in ‘GOCE’: A Review
M.-H. Rio

Keynote Geodesy:
GOCE & Antarctica
R. Forsberg

Keynote Oceanography II:
Beyond Currents: The Next Phase in GOCE Oceanographic Research
R.J. Bingham, K. Haines & C.W. Hughes

The New GOCE Science Products:
Gravity Field Models and Gravity Gradient Data

Chairs: H. Sünkel & P. Visser

Evaluation of Release-3, 4 and 5 GOCE-Based Global Geopotential Models in North America
M.G. Sideris, B. Amjadiparvar, E. Rangelova et al.

Contribution of GOCE RL05 Models to Height System Unification in North America
B. Amjadiparvar, E. Rangelova, M.G. Sideris & C. Gerlach

GOCE Precise Orbit Determination for the Entire Mission – Challenges in the Final Mission Phase
A. Jäggi, H. Bock & U. Meyer
**Oceanography**  
*Chairs: M.-H. Rio & P. Knudsen*

An Oceanographic Assessment of the GOCE Geoid Models Accuracy  

GOCE Geoids and Derived Mean Dynamic Topography in the Arctic Ocean  
O.B. Andersen & P. Knudsen

Assessing GOCE Gravity Models Using Altimetry and In-Situ Ocean Current Observation  
P. Knudsen, O.B. Andersen

Nonlinear Diffusion Filtering of the GOCE-Based Satellite-Only Mean Dynamic Topography  
R. Čunderlík & K. Mikula

**Solid Earth**  
*Chairs: M. van der Meijde & J. Ebbing*

GOCE Gradient Tensor Characterization of the Coupled Paraná (South America) and Etendeka (Africa) Magmatic Provinces  
P. Mariani & C. Braitenberg

Estimates of the Elastic Thickness of Antarctica from GOCE Gravity Models  
D. McKenzie, W. Yi & R. Rummel

Use of Topography in the Context of the GOCE Satellite Mission – Some Examples  
M. Rexer, C. Hirt, S. Claessens & C. Braitenberg

Geological Implications From Complete Gondwana Goce-Products Reconstructions and Link to Lithospheric Roots  
C. Braitenberg & P. Mariani

**Geodesy**  
*Chairs: G. Balmino & F. Sansò*

On the Combination of Terrestrial Data and GOCE Based Models in Earth’s Gravity Field Studies: Compatibility and Optimization  
P. Holota & O. Nesvadba
Aeronomy / Novel Applications

Chairs: J. Forbes & M. Kern

Thermospheric Density Variations Due to Space Weather
T. Laitinen, J. Iipponen, I. Honkonen et al.

Test of GOCE EGG Data for Spacecraft Positioning
X. Sun, P. Chen, Y. Han et al.

Science and Engineering Lessons from the De-Orbiting and Re-Entry Phase

Chairs: C. Pardini & H. Krag

The Deorbiting of GOCE – A Spacecraft Operations Perspective
C. Steiger, M. Romanazzo, R. Floberghagen et al.

GOCE Re-Entry Campaign
B. Bastida Virgili, T. Flohrer, S. Lemmens & H. Krag

Precise Orbit Determination of the GOCE Re-Entry Phase

GOCE Reentry Predictions for the Italian Civil Protection Authorities
C. Pardini & L. Anselmo

Calibration of Radar Based Re-Entry Predictions
S. Lemmens, B. Bastida Virgili, T. Flohrer et al.

Future Gravity Field Missions

Chairs: N. Sneeuw & R. Haagmans

From GOCE to the Next Generation Gravity Mission
S. Cesare, A. Allasio, A. Anselmi et al.

Measuring the Earth's Gravity Field with Cold Atom Interferometers
O. Carraz, C. Siemes, L. Massotti et al.

Summary and Recommendations

Summary and Recommendations from the Fifth International User Workshop
J. Benveniste, R. Floberghagen & Session Co-Chairs
POSTERS

The New GOCE Science Products, Gravity Field Models and Gravity Gradient Data
Chairs: H. Sünkel & P. Visser

The IfE Global Gravity Field Model Recovered from GOCE Orbit and Gradiometer Data
H. Wu, J. Müller & P. Brieden

Calibration / Validation and Data Quality
Chairs: H. Sünkel & P. Visser

Validation of Global Gravitational Field Models in Norway
B.R. Pettersen, M. Šprlák & C. Gerlach

Effects of the Magnetic Field on the GOCE Level 1B Gradiometer Data over Magnetic Poles
E.S. Ince & S.D. Pagiatakis

Geodesy
Chairs: G. Balmino & F. Sansò

Gravity Field Solution Derived from Recent Releases of GOCE-Based Geopotential Models and Terrestrial Gravity Observations over The Kingdom of Saudi Arabia
A. Alothman & B. Elsaka

Updated Hungarian Gravity Field Solution Based on Fifth Generation GOCE Gravity Field Models
G. Tóth & L. Földváry

Improvement of Latvian Geoid Model Using GNSS/Levelling, GOCE Data and Vertical Deflection Measurements
I. Janpaule, D. Haritonova, J. Balodis et al.

An Evaluation of Recent GOCE Geopotential Models in Brazil
D. Blitzkow, A.C. Oliveira Cancoro de Matos, G. do Nascimento Guimarães & M.C.B. Lobianco

Aeronomy / Novel Applications
Chairs: J. Forbes & M. Kern

GOCE SSTI Tracking Stability and Accuracy
P. Niemann, B. Frommknecht & R. Thor
Science and Engineering Lessons from the De-Orbiting and Re-Entry Phase

Chairs: C. Pardini & H. Krag

Characteristics of the GOCE Orbit in the Re-Entry Phase
J. Hamm, A. Lengsfeld, U. Kekec et al.

GOCE SSTI GNSS Receiver Re-Entry Phase Analysis
A. Zin, S. Zago, L. Scaciga et al.
